

Avary Mitchell

Full Stack Software Engineer

Jacksonville, Florida | 929-888-1764 | avarynmitchell@gmail.com | <https://github.com/Anmitchell> | Portfolio | <https://www.linkedin.com/in/avary-mitchell-6b493612a/>

Software Engineer with a background in banking records, technology, and operations. Driven to solve problems/challenges that require a natural curiosity for how to optimize technology for businesses and people. I thrive on high performing teams that value creative ideas and thinking outside the box. I firmly believe that technology should serve as a catalyst for positive societal transformation and foster a future that upholds the values and principles that make us human.

RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | Month Year – Month Year

Successfully completed 500+ hours of expert led instruction in HTML, Javascript, CSS, and hands on learning of front and back-end fundamentals and the industry's most in demand technologies. Developed 5 projects.

Custodial Records Associate | US BANK | Jacksonville | September 2022– Current

- Promoted from contractor to Custodial Record Associate in record time based on exemplary performance.
- Quickly processes loan documents that are coming in or out for an acquisition or sale, research file or document activity, and inventory files via emBTrust (system of record for document custodians)
- Provides accurate tracking of documentation from intake through disposition and comprehensively monitors across each customer's portfolio through batch query capabilities and transaction processing in real-time.
- Been given a critical role in locating and or processing requested documents and files to meet deadlines and adhere to established Service Level Agreement (SLAs)

Office Moving Coordinator | Swiss Post Solutions | New York | April 2016 – March 2018

- Executed and managed all floor plans, new hire onboarding information. Met with admins, team managers, and executives to discuss logistics, blockings, and details of office moves
- Experience building custom PC's and diagnosing software issues reduced company need to spend resources on brand new hardware and additional fees for I.T services
- Provided A/V assistance for major presentations, meetings, and live events.
- Written and detailed user manuals of office operations for future management establishment.
- Contributed major office seating layout that helped company save approximately \$100,000 in new office equipment needed for company expansion

Controls Print Supervisor | Swiss Post Solutions | New York | July 2016 – March 2016

- Managed all aspects of daily check print production ensuring overall quality and delivery schedule are met with minimum or no cost run overs.
- Analyzed, examined and reported for roughly \$50,000,000 in checks monthly for vendor transmittal process
- Supervised and organized a team of 3 associates to resolve any check balance issues and achieve reporting deadlines.
- Test and troubleshoot equipment on-site to ensure print quality and MICR font/alignment for checks meets standards for bank approval
